RAGHVENDRA VISHWAKARMA

Java/Spring Boot Developer | PHP/Laravel | AWS | API Integration | CI/CD

+91-9993103682 ■ ramanvishwa121@gmail.com ■ www.linkedin.com/in/raghav2121 ■ Indore, Madhya Pradesh – 452011

SUMMARY

Software Developer with B.Tech in Computer Science and 2.5 + years in backend systems, including Java/Spring Boot projects in REST APIs, JPA, and microservices. Built scalable applications (10K+ MAU) using SOLID principles; integrated payments and notifications. Optimized performance (45% faster loads) via caching and queries. Skilled in AWS, DevOps, and cross-stack development for high-performance systems. Seeking Java developer roles to leverage OOP and API expertise.

SKILLS

- **Core Technical** : Java (OOP, Collections, Multithreading, Lambdas), Spring Boot (MVC, REST, JPA, Security), PHP, Laravel (Artisan, APIs), MySQL/PostgreSQL, SQL Optimization.
- **Frontend/Tools**: JavaScript, jQuery, Bootstrap 5, HTML5/CSS3, Postman, Git, Maven/Gradle, IntelliJ IDEA.
- **DevOps/Cloud** : AWS (EC2, S3, RDS, Lambda), Docker, GitHub Actions (CI/CD), SOLID Principles, Repository Pattern, Unit Testing (JUnit/Mockito).
- **Soft-Skills** : Problem-Solving, Team Collaboration, Time Management.
- **Language** : English, Hindi.

WORK EXPERIENCE

WTM IT Limited – Software Developer | Indore, MP | 08/2023 – 10/2025

- Developed and maintained backend applications using SOLID principles and modular architecture for scalability.
- Built RESTful APIs for frontend integration, reducing latency and enhancing responsiveness—applicable across Java/Spring Boot and PHP stacks.
- Optimized database queries and caching, achieving 45% faster load times and 30% efficiency gains.
- Integrated payment gateways (Razorpay) for 10K+ transactions and notification APIs (SMS/WhatsApp) with 99.9% reliability.
- Automated CI/CD pipelines with GitHub Actions, halving release cycles; applied version control and code reviews.
- Gained hands-on AWS experience in deployments (EC2, S3, RDS) within CI/CD workflows.

PROJECTS

PROJECT 1 : ERP System – Enterprise Resource Planning Platform | 10/2025 – Present

Project Link: https://github.com/raghav993/ERP-Project-Spring-Boot

- Developed a backend ERP system using Spring Boot and Java for resource management, user roles, and reporting.
- Implemented REST APIs, JPA for database interactions, and security features; optimized for scalability with modular design.
- Integrated testing with JUnit and deployed via Maven, ensuring high performance and maintainability.

PROJECT 2 : Veloxinfra – Real Estate Listing Platform | 03/2024 – 10/2025

Project Link: https://veloxinfra.com

- Developed admin panels for management and SEO; implemented advanced search/filtering.
- Enhanced performance with optimized Eloquent models; maintained Git/CI/CD.

PROJECT 3 : Tolxa – Vacation Rental Platform | 10/2023 – 06/2024

Project Link: https://tolxa.com

- Built scalable Laravel 10 platform for bookings and notifications (500+ listings).
- Integrated Razorpay with webhooks (5K+ transactions, 99.9% success) and SMS/WhatsApp APIs.
- Optimized UI/UX with AJAX and Bootstrap; configured Git/CI/CD for deployments.

EDUCATION

Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV) | 08/2019 – 06/2023
B.Tech in Computer Science and Engineering

CERTIFICATIONS

- **AWS Cloud Practitioner Essentials** -   Completed course focused on foundational AWS cloud concepts and services.
- **AWS for Beginners** -   Introductory course for beginners to understand AWS elements and services.
